Advanced Cybersecurity

FCS Advanced Cybersecurity CURRICULUM MAP

Georgia's Advanced Cybersecurity Standards

Georgia's Advanced Cybersecurity Standards							
Semester 1					Semester 2		
Unit 0	Unit 1	Unit 2	Unit 3	Unit 4	Unit 5	Unit 6	Unit 7
Launch & Foundations	Malware, Legal Framework & General Security Concepts	Advanced Threat Analysis — Attack Vectors & Vulnerability Management	Network Security, Wireless & Infrastructure Architecture	Cryptography, PKI & Semester 1 Capstone	Security Operations — IAM, Endpoint Security & Monitoring	Policy, Governance, Risk, Compliance & EOPA Prep	Operation. Protect. Detect. Respond. — Year 3 Capstone
3 class meetings <u>Unit Dates</u> Aug 3-8, 2026 Wk 1	8 class meetings <u>Unit Dates</u> Aug 10 – Sep 4, 2026 Wks 2-4	8 class meetings <u>Unit Dates</u> Sep 8 – Oct 2, 2026 Wks 5-7	8 class meetings <u>Unit Dates</u> Oct 5 – Nov 6, 2026 Wks 8-11	8 class meetings <u>Unit Dates</u> Nov 9 – Dec 12, 2026 Wks 12-14	8 class meetings <u>Unit Dates</u> Jan 5 – Feb 5, 2027 Wks 1-4 Sem 2	8 class meetings <u>Unit Dates</u> Feb 8 – Apr 4, 2027 All coursework submitted by Apr 4; post-break = EOPA review + capstone EOPA: Apr 12-30 Wks 5-9 Sem 2	8 class meetings <u>Unit Dates</u> Apr 12 – May 27, 2027 EOPA window: Apr 12-30 Wks 10+ Sem 2
Learning Expectations Students will understand that Advanced Cybersecurity is the professional year — everything built in Years 1 and 2 culminates in a Security+ credential and a capstone that demonstrates readiness for entry-level work. Standards IT-ACS-1 (Employability)	Learning Expectations Students will understand that legal and ethical frameworks govern every professional security decision — and that understanding malware at a technical level is necessary for building effective defenses. Standards IT-ACS-2, IT-ACS-3	Learning Expectations Students will understand that advanced threats exploit layers of vulnerability — technical, human, and organizational — and that defenders must anticipate attack paths before attackers walk them. Standards IT-ACS-4	Learning Expectations Students will understand that secure architecture requires intentional design — every network component, protocol choice, and access policy is a security decision with measurable consequences. Standards IT-ACS-6, IT-ACS-11	Learning Expectations Students will understand that cryptographic security depends on implementation, key management, and human decisions — not just the strength of the algorithm. Standards IT-ACS-5	Learning Expectations Students will understand that continuous monitoring, identity management, and endpoint defense are the operational backbone of any mature security program. Standards IT-ACS-9, IT-ACS-7	Learning Expectations Students will understand that organizational security requires governance, risk management, and compliance frameworks — and that professional security work always culminates in written documentation that drives organizational decisions. Standards IT-ACS-7.4, IT-ACS-8, IT-ACS-10	Learning Expectations Students will understand that professional security work always produces two things: a technically accurate analysis AND a human-centered communication of that analysis — because security decisions are made by people, not machines. Standards IT-ACS-1, IT-ACS-2, IT-ACS-7, IT-ACS-8, IT-ACS-9, IT-ACS-10 All Security+ domains (synthesis) CISA Critical Infrastructure Sectors

Complete Standards Alignment

All standards addressed this year, by unit.

GA Standard	Description	Primary Unit
IT-ACS-1	Employability skills — professional identity, career readiness	Units 0, 7
IT-ACS-2	Principles of cybersecurity — actors, motivations, threats	Unit 1
IT-ACS-3	Security laws, regulations, and compliance	Unit 1
IT-ACS-4	Attack techniques and threat intelligence	Unit 2
IT-ACS-5	Cryptography and PKI	Unit 4
IT-ACS-6	Network security architecture	Unit 3
IT-ACS-7	Security policies and documentation (7.4: policy writing)	Units 5, 6
IT-ACS-8	Risk management and governance	Unit 6
IT-ACS-9	Security monitoring and operations	Unit 5
IT-ACS-10	Compliance and audit	Unit 6
IT-ACS-11	Cloud and infrastructure security	Unit 3
